

Angus Information Management Software (AIMS) 

**A Windows-based software program to simplify your Angus herd recordkeeping.**

### Features

- Quick access to pedigree, performance and EPD information.
- Access animals by tattoo, tag, registration number, electronic ID, name or sire/dam ID.
- Simplified reporting of performance data, registrations, registrations & transfer OR transfer animals if you store certificates electronically at the Association.
- Extensive data validation to ensure accurate records before submitting to the Association which helps insure next day turn around.
- Display and print projected EPDs based on breeding or calving data.
- Calculate ratios, rankings and adjusted weights.
- Automatically determine most likely sire and calving date along with an area to keep preg check information.

### Features

- Track animal purchase and sale information along with complete customer information.
- Records carcass and ultrasound data.
- Maintain medical and income/expense records.
- Record ET information.
- Spreadsheet style screens improve speed of entering large amounts of data.
- Print worksheets for use in the pasture or barn.
- Over 50 standard reports that are included in the software.
- Custom reports for buyers, sale catalogs, herd evaluation and a variety of management tools.

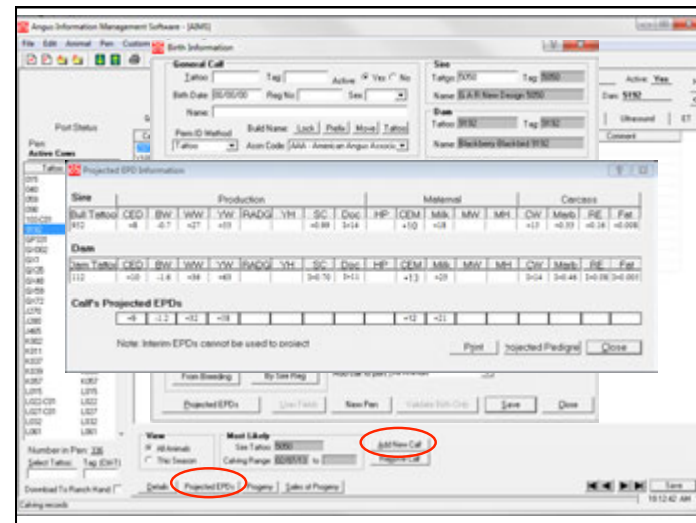

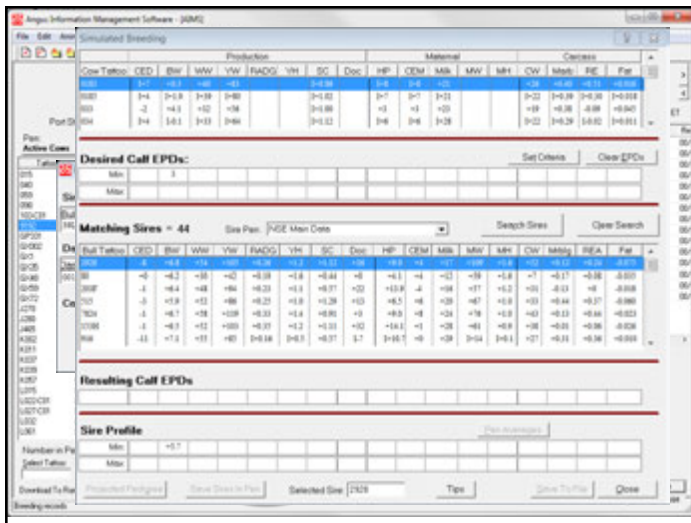

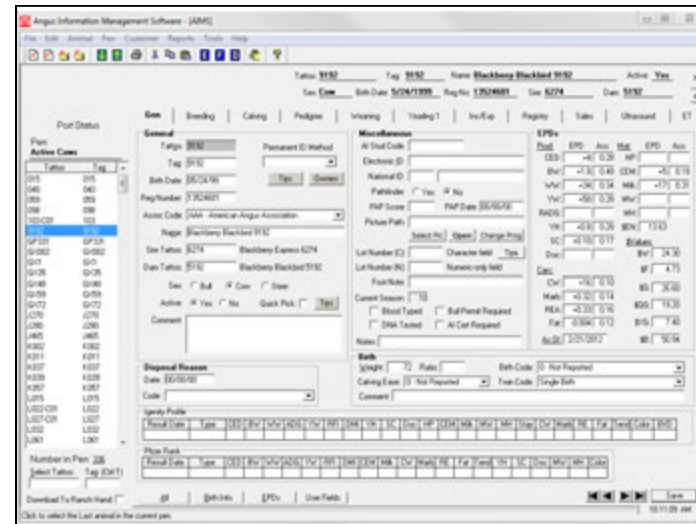

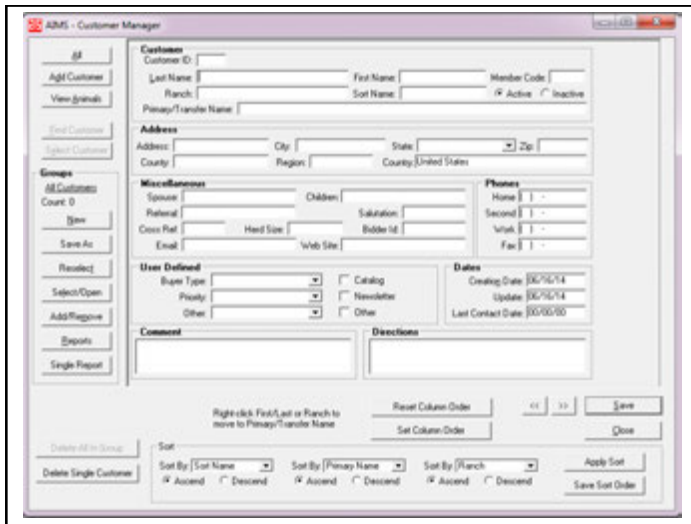

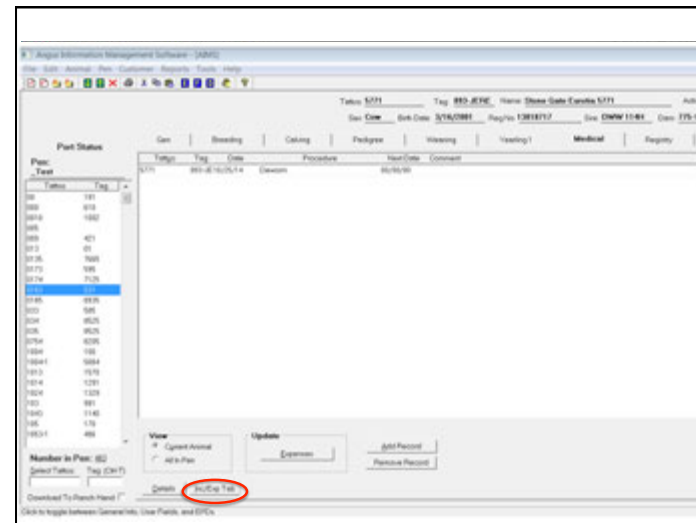

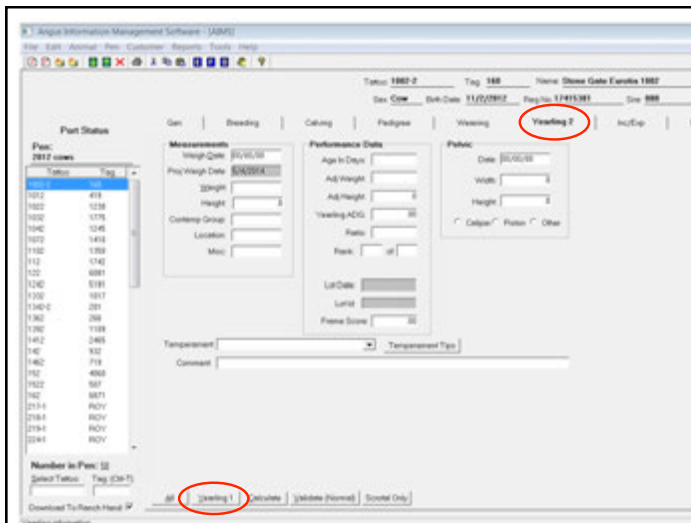

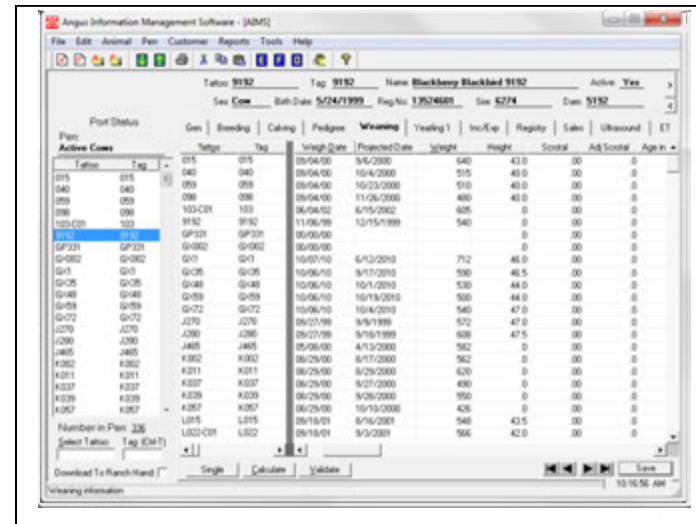

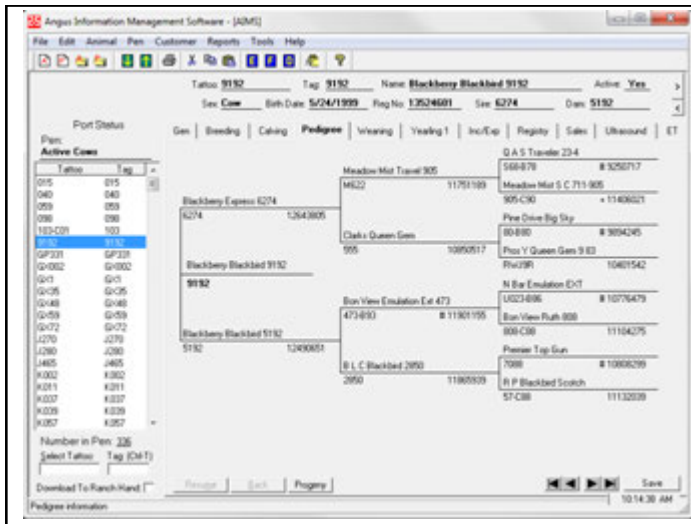

### Features

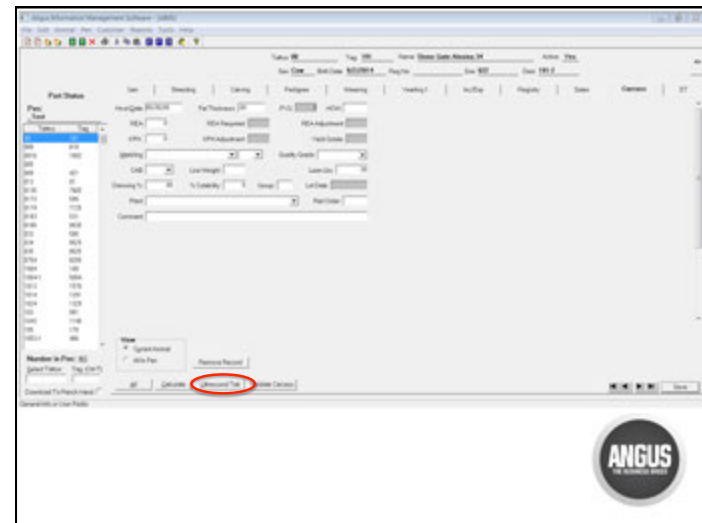

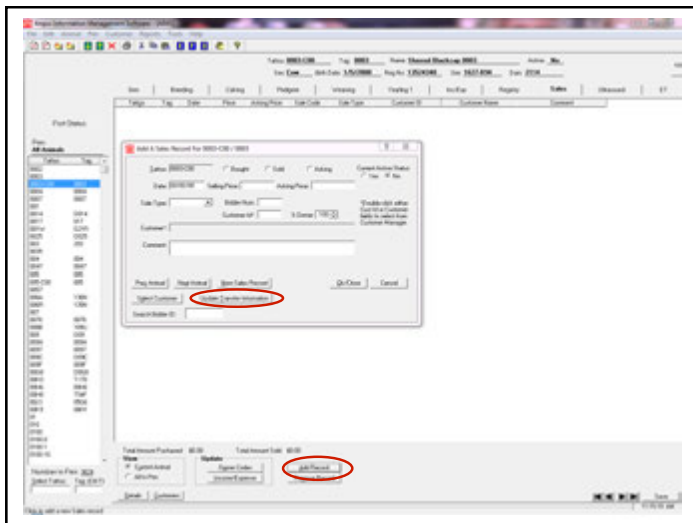

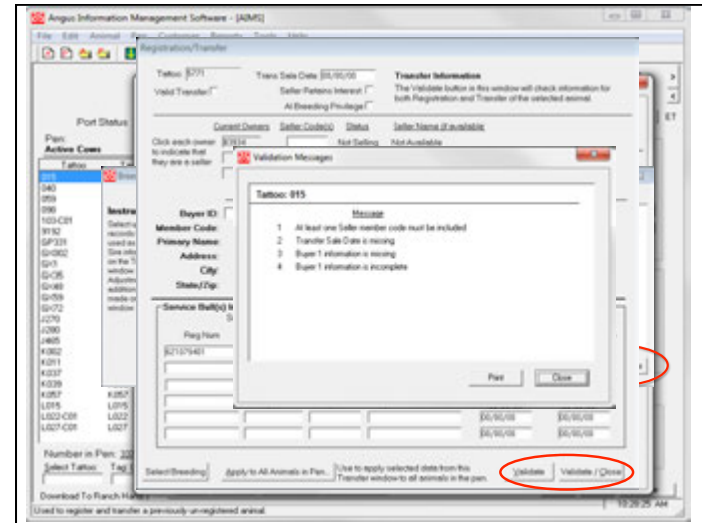

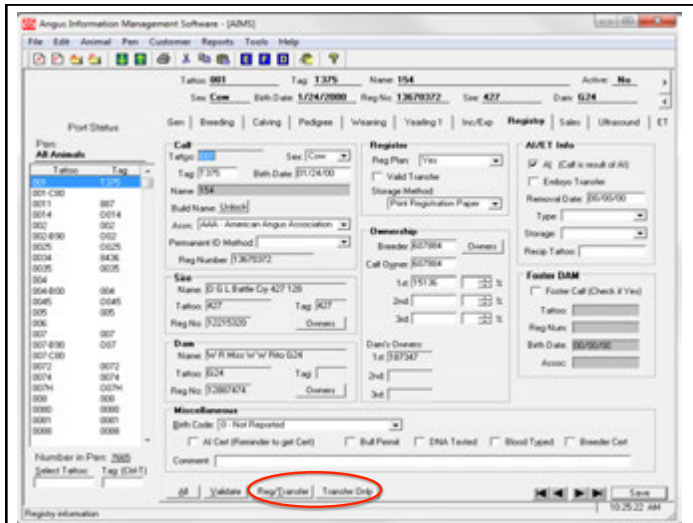

#### Customer Manager

- The Customer Manager portion of AIMS includes over 35 fields to record complete address and phone numbers, spouse and children names, email and web site, herd size and member code, directions to their ranch, plus a lot more.
- It even has six user-defined fields to keep track of things like buyer type, a priority code or whether they should get a newsletter and catalog.
- If Sales Records have been kept in AIMS with a click of a button you can see a button you can see all animals a particular buyer has purchased.
- Reports are available to show which customers purchased which animals as well as mailing labels and a "contact sheet" for quick access to phone and address information.

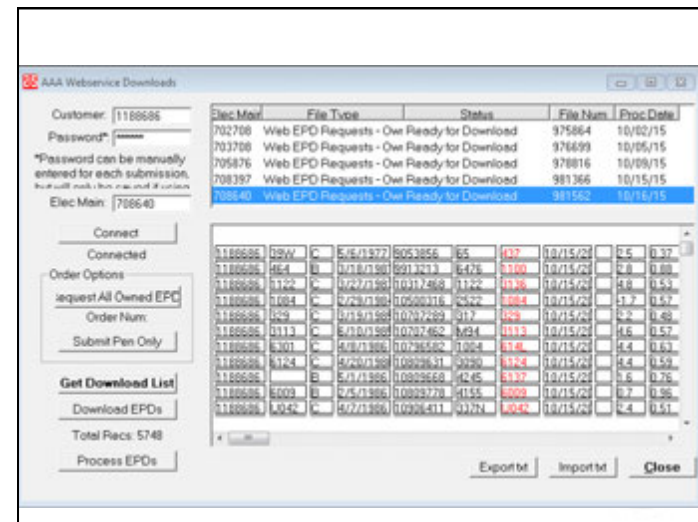

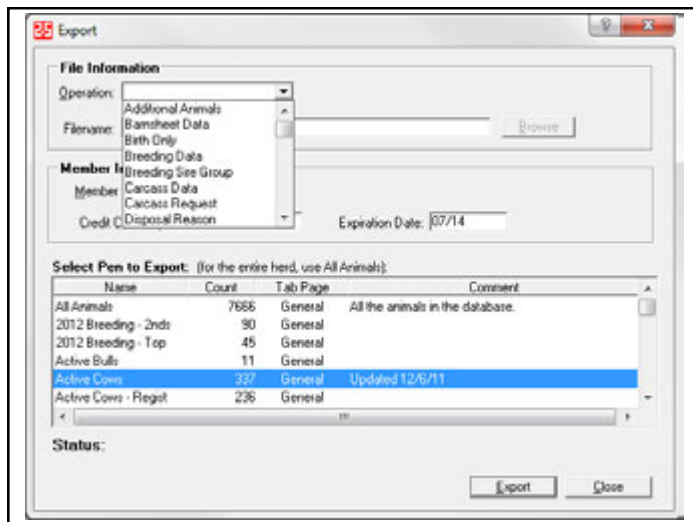

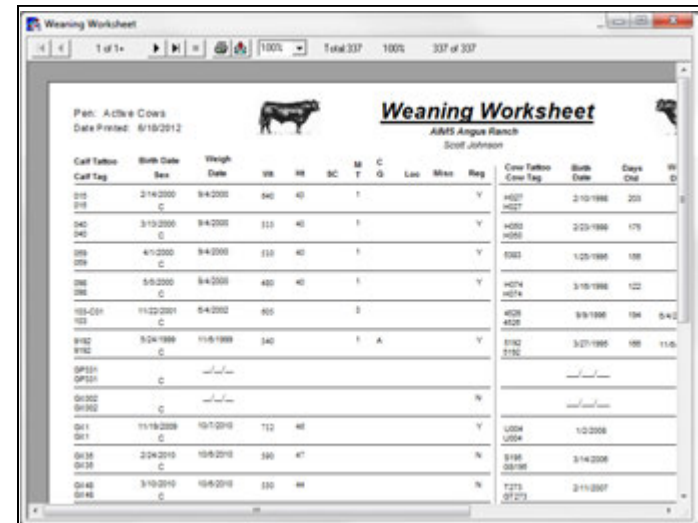

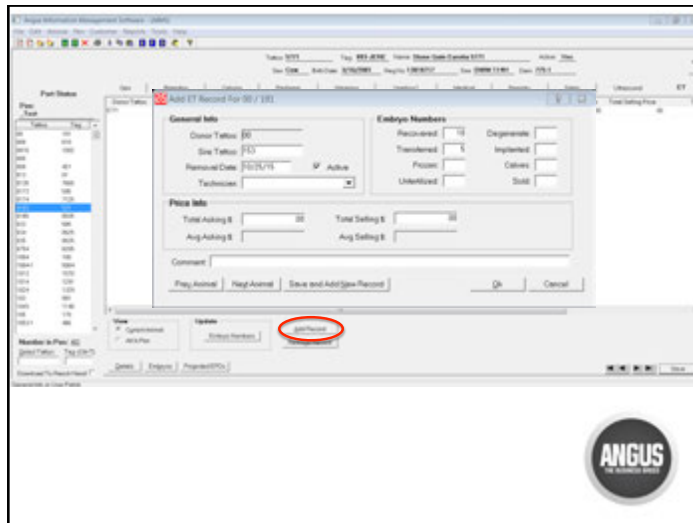

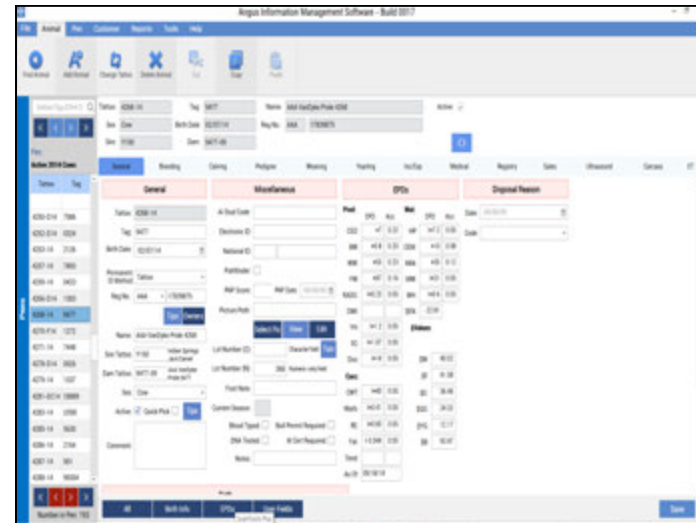

## Future of AIMS

We are actually in the process of re-tooling AIMS to give it a more modern look and feel. The retooling process allows us to use the same language we use for our in house software and Angus online which will give us the ability to make AIMS more user friendly with Angus online plus give us the ability to update Crystal Report writer which is used to make the reports and allow for more capabilities with an updated version.
