

FUTURE ANGUS STOCKMEN

Cattle farming and ranching is a risky business.

The Future Angus Stockmen program is aimed toward college-age or recent graduates who want to raise high quality Angus-based commercial cattle. Participants will learn to:

- Use proven information such as expected progeny differences (EPDs) and dollar-value indexes (\$Values);
- Incorporate DNA technology to make data-driven decisions;
- Develop a recordkeeping plan by using the Beef Record Service (BRS) or MaternalPlus® at a reduced cost for submitting data;
- Connect and share ideas with cattle producers from throughout the nation; and
- Use American Angus Association programs to benefit their commercial operations.

In partnership with Zoetis, the American Angus Association will offer those enrolled in the program a special, reduced rate for GeneMax® DNA tests

They will also receive complimentary enrollment in AngusSource® — the Association's marketing program for Angus-sired feeder calves and replacement females.

Thanks to funds provided by Allflex and Destron Fearing, participants will also have the chance to apply for scholarships if they are, or will be, enrolled in a two-or four-year college majoring in agriculture. Scholarship winners will be announced at the Angus Convention.

Future Angus Stockmen participants are also eligible for additional education opportunities, such as an AI school sponsorship courtesy of Select Sires.

For more information on how to get involved in Future Angus Stockmen, visit www.angus.org.
